Definitions

Reported Abductions Outgoing: The number of children involved in international parental child abductions and reported to the Office of Children’s Issues during a calendar year, including those filed with a foreign central authority and those which remained in preliminary status. This includes abductions to both Hague and Non-Hague countries.

Reported Abductions Incoming: The number of children involved in international parental child abductions submitted to the Office of Children’s Issues during a calendar year. Almost all of these instances would have been submitted by a foreign central authority. This includes abductions from both Hague and Non-Hague countries.

Returns: All children previously reported as abducted who returned to their country of habitual residence during the calendar year. The number is based on the year of actual return, regardless of the year in which the child was abducted or when the Office of Children’s Issues was informed of the return.

Requests for Access: The number of children involved in requests for access under the Hague Convention received by the Office of Children’s Issues during the calendar Year.
